

A Classic Refashioned

Versatile and design-friendly, porcelain ceramic tiles in a variety of sizes, shapes, colors and configurations were an ideal choice for refashioning the main lobby of the Andrus Building in downtown Minneapolis.

Mosaic tile inserts complement other wall and graphic treatments to create an eclectic and eye-appealing space for tenants and visitors.

It's a classic refashioning for the iconic 120-year-old building.

Large format tile sheets form a clean and elegant surround to the elevators, on the street side exterior walls, in the hospitality niche and on the security desk.

Our skilled craftspeople install ceramic tile and stone products in commercial architecture and interior design applications. Check out project photos and videos at www.ceramicatiles.net

Wood-look porcelain ceramic floor tiles intersperse with carpeted gathering areas and the main lobby granite.
