

Pattern Perfect

More than 18,000 sq. ft. of quarry tile provides a 21st century update to the basement level of the renovated State Capitol. Earthtone rectangular tiles are arranged in a perfect pattern around limestone walls and massive support columns. It's a crisp and classic design that promises excellent durability for the historic renovation.

Colorful hexagon mosaic ceramic tile, classic in form and function, offsets limestone brick walls in the walkway and entry to the Minnesota State Capitol's iconic basement-level Rathskeller Cafe.
