

Suite Success

Whether used as a focal product or intercut with stone for added aesthetic appeal, glazed ceramic tile is a versatile and eye-appealing floor covering. There's no better product for wearability and design excellence.

Many suites and lounge areas in US Bank Stadium use an array of porcelain ceramic products such as tile planks, stair treads, glass mosaics and wall panels. Ceramic always blends well with other floor and wall coverings while providing excellent wear characteristics. Call it suite success on a grand scale!
