There's a bright and welcoming two-floor lobby at RBC Plaza. Alternating colors of polished marble intercut with terrazzo create a unique hopscotch design. In the lower level, health club locker room walls have bone matte and bone bright ceramic with accent ribbons of polished encasement marble. It's an eye-pleasing visual effect that's durable and dependable.

Here's a nifty idea: Mingle different flooring products like marble, ceramic tile and terrazzo to produce variable colors and textures. They're long on wear and easy on care.
