

Dramatic & Elegant

Modern, airy and luxurious, the upscale Hilton Hotel in downtown Rochester uses more than 140,000 square feet of porcelain ceramic tile and stone, producing visually appealing surfaces and contemporary design flexibility.

Porcelain ceramic tile is an integral part of the registration desks, lobby floors and walls, a lavish circular stairway and in 267 guest room configurations.

From durable pool and floor surfaces to a high-design wall intercut with lantern lighting, porcelain tile offers stunning visual impact coupled with outstanding durability.

Our skilled craftworkers install ceramic tile and stone products in commercial architecture and interior design applications.
