Re-purposing the classic, 106 year-old Plymouth building into a high-end hotel was the perfect application for more than 100,000 square feet of design-adaptable porcelain ceramic tile. The flowing visual impact of Sassuolo Wood Wenge and several other ceramic products couples with natural stone to provide 'Makeover Magic' for the Embassy Suites.

The intricate veining and organic color palette of River Marble Porcelain resembles rich, luxurious marble, but in the practicality of durable tile. Its polished finish is perfect for a classic or contemporary style.

Our skilled craftworkers install ceramic tile and stone products in commercial architecture and interior design applications.
